

Theses

No.	Researcher's name	Theses
1-	Nagham Saadoun Ibrahim	The effect of adding different concentrations of chelated iron on fruit production in celery and cabbage plants
2-	Ayoub Kazem Khamis	A comparative taxonomic study of <i>Trigonella L.</i> species in Iraq
3-	Shaima Hatem Al-Salhi	Detection of secondary metabolic products and mineral elements in the plant <i>Ruta chalepensis L.</i> , extraction of its volatile oil and the extent of its effect on some pathogenic bacterial species.
4-	Sondos Adel Naji	Studying the effect of honey on the bacteria that contaminate burns and the possibility of using it in treatment
5-	Ibtihal Jassim Ali	Serological epidemiological study of toxoplasmosis in Diyala Governorate - Iraq
6-	Tamara Amer Taher	Determining the titer of activated protein C in patients infected with acute and chronic viral hepatitis B
7-	Asma Haseeb Huwayd	Seroprevalence of specific antibodies to German measles virus in Baquba, Diyala Governorate
8-	Ali Jaafar Salim	Biochemical study of basal protease produced by <i>Pseudomonas aeruginosa</i> bacteria isolated from patients.
9-	Nour Sabah Naji	Hardening wheat (<i>Triticum aestivum L.</i>) seeds with calcium salts and its effect on the plant's load on salinity.
10-	Afak Rasheed Salman	Virulence of some types of <i>Proteus spp.</i> Isolated from otitis media in Baqubah
11-	Souad Khairy Abdel Wahab	The effect of the direction of lines and the distribution of plants on light interception, growth characteristics, and yield of yellow corn (<i>Zea mays L.</i>)
12-	Diyar Sakban Alwan	Detecting the fungi associated with <i>Nigella sativa</i> seeds and evaluating their effect on the plant and their biological resistance.
13-	Zainab Hussein Mahdi	Study of virulence factors and drug sensitivity in enterococci isolated from patients
14-	Dhamia Ibrahim Alwan	The effect of aqueous extracts of some plants on the infection of the parasite <i>Entamoeba histolytica</i> in vitro
15-	Ghassan Hamdan Jamil	The effect of immune activation in reducing the pathogenicity of the parasite <i>Echinococcus granulosus</i> in white mice.
16-	Adawiya Fadel Abbas	Distribution of specific antibody titers for <i>Salmonella</i> in Diyala Governorate and the effect of some factors on them
17-	Abbas Yassin Hassan	Study of the effect of pomegranate peel extract on bacteria isolated from tonsillitis patients in Diyala Governorate and some of their immune characteristics.
18-	Maysaa Taqi Abdul Hassan	The incidence of skin fungal infections among residents

		in the city of Baqubah
19-	Saba Jassem Jawad	Serological study on viral hepatitis (type A) in the city of Baqubah
20-	Solaf Naji Hassan	A taxonomic study of some types of stink bugs, pentatominae (Hemiptera: pentatomidae) in some areas of Diyala Governorate
21-	Buroj Muhammad Arzouki	Bacterial otitis media in Diyala
22-	Maha Ali Abdel Amir	Study of the inhibitory activity of oak bark extract <i>Quercus</i> sp. Against pathogenic bacterial isolates
23-	Amira Fadel Ahmed	Common allergens causing allergies in the city of Baqubah and their role in protecting against intestinal parasite infection
24-	Yasser Zidane Khalaf	The effect of foliar nutrition at different growth stages on the growth and yield of wheat plants (<i>Triticum aestivum</i>)
25-	Sanaa Najm Abdel	A taxonomic study of some types of insects of the meat fly family (Diptera, Sarcophagidae) in Diyala Governorate
26-	Hayad Jumaa Hameed	The effect of mothin F2a and black seed oil on liver and gall function in male albino rats
27-	Aseel Kazem Al-Anbari	Hardening sorghum bicolor (L.) Menc seeds and its effect on increasing the plant's tolerance to drought.
28-	Walaa Najm Abboud	A seroepidemiological study of viral hepatitis E in Diyala Governorate
29-	Thekra Atta Ibrahim	Embryonic formation of the gas cyst of the mosquito fish <i>Gambusia affinis</i> (Baird and Girard)
